

Who: **Dr. Boris Kayser (Fermilab)**

What: ***“Answering the Neutrino Questions”***

When: **Fri., Nov. 10 @ 2:30 P.M.**

Where: **210 Robeson Hall**

Why: **You’ll learn a lot.** (Plus, there’s cookies!)

How: Sponsored by the Virginia Tech
Physics Dept. Colloquium series

Abstract:

The discovery that neutrinos have nonzero masses has raised a number of very interesting questions. After reviewing what we have learned so far about the neutrinos, we will identify the open questions, explain why they are interesting, and discuss the evolving experimental program to answer them.
