

Dr. Annalisa Pawlosky and Google provided a donation to the Ladies of Robeson (LOR). LOR as a student club, has been aiming to provide a support group for female students to interact with different groups at the departmental level as well as distinguished outside scientists. Dr. Pawlosky, as a former active member of the LOR, received her Bachelor of Science in Physics from Virginia Tech in 2006 and her PhD from MIT in the Harvard-MIT Division of Health Sciences and Technology program in 2014. At Google, she is the founder and principal investigator for the accelerated science biochemistry and molecular biology laboratory.

More about Dr. Pawlosky's work can be found at:
